

Instructions for Project Deliverable-2

10/26/17

General Instructions

- One of the group members should submit the project deliverables before the due date. Late submissions will not be accepted. PLEASE MAKE SURE THAT EACH GROUP SUBMITS EXACTLY ONE COPY.
- Please mention the full names and NetIDs of the group members at the top (just after the title) of the submitted document.
- Please submit a SINGLE FILE(.pdf) that includes all the texts and diagrams. Name the file as **"Group XX deliverable 2" (e.g. Group 02 deliverable 2.pdf)**

Specific Instructions for Deliverable 2

- Please read the attached ER diagram. We use the notations taught in the course.
- Map the ER-diagram to relations (tables) using the mapping rules taught in the course. Keep in mind the design principles of databases while doing the mapping. Less redundancy, lesser number of tables etc. will be given more credits.
- Create the tables using SQL. Incorporate all the key constraints into the table definitions.
- Include the SQL queries in your.pdf file.
- Clearly specify the assumptions, if you have any.
