Instructions for Project Deliverable-1

October 10, 2017

General Instructions

- One of the group members should submit the project deliverables before the due date. Late submissions will not be accepted. PLEASE MAKE SURE THAT EACH GROUP SUBMITS EXACTLY ONE COPY.

- Please mention the full names and NetIDs of the group members at the top (just after the title) of the submitted document.

- Please submit a SINGLE FILE(.pdf) that includes all the texts and diagrams. Name the file as
  "Group _XX deliverable 1" (e.g. Group 02 deliverable 1.pdf)

Specific Instructions for Deliverable 1

- Please read the requirement specifications in the project specification file and design a clean and detailed conceptual schema (ER diagram) using the notations taught in the course.

- Carefully identify the key attribute(s) of each entity and the cardinality constraints and participation constraints for each relationship.

- Clearly specify if you have made any assumption in your design that go beyond what is given in the project description.

- Hand-written diagrams are NOT acceptable as they often have poor readability. You can use freely available tools to draw your diagrams (e.g. www.draw.io).
